Pursuant to preliminary amendment (filed 3/23/05), claims 2 & 4-7 have been amended, claims 3, 8 & 9 cancelled, and claim 14 added.

. . . .

Applicants are required under 35 U.S.C. §121 to elect disclosed species (as follows) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

a) one of the following: (i) a compound *per se*, or (ii) a composition which contains a “first” compound that falls within the scope of claim 1 in combination with a “second” compound or other material;

b) one of the following: (i) the compound falling within the scope of claim 1 is labeled with a metal ion, or (ii) the compound falling within the scope of claim 1 is not labeled with a metal ion;

c) in the event that the compound falling within the scope of claim 1 is labeled with a metal ion, which metal ion is it, and which isotope is it?

d) in the event that a composition is elected (rather than a compound *per se*), what are the contents of the other compounds present that make the composition a composition (rather than a pure compound)...?

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.
